Hi SOL Families,

## SOL Surveillance Video Policy

SOL has installed a surveillance video in each SOL **Main classroom, hallway, and outside playground**. This decision was made based on the following reasons: security of the center, staff (especially since parents are not allowed in the facility due to COVID), documentation of the children (if there is an incident in question) and for staff development. This has been a decision that I have grappled with over the years, but now with COVID it is in the best interest of SOL Main Center to have the security cameras. SOL has recently had several vandalism bouts in the past few months, abandoned cars etc

The camera is only for the viewing by SOL management, licensing, or CPS. The children and staff are not being audio recorded.

I \_\_\_\_\_ understand and give permission that SOL will Capture my child's image on surveillance video used at this childcare facility.

*I have reviewed the licensee's written policies and have had the opportunity to discuss with the licensee the policies pertaining to the items listed on this permission form.*
